Greater Results Guarantee

Snapshot Report

Under the agreement for 2014 Ravenshoe State School P-12 received $343,680.00
Our full 2014 agreement can be found here:

Support provided to enhance our Literacy and Numeracy standards for each year level engaged in NAPLAN testing included continuing program and personnel funding associated with this school’s National Partnership priorities, which covered improving attendance, community partnerships, and increasing student interest and participation in Senior Schooling.

Progress towards attainment of National Minimum Standards in Literacy and Numeracy across Years 3, 5, 7, and 9 was generally limited and we did not reach our determined goals.

Specific support provided to potential U2B level students in Year 5 and Year 7 achieved proved successful - our Year 7 students, in particular, attained national averages or better in every category of testing in Literacy and Numeracy.

We implemented:

- Early Start Reading program for P-2 and Year 3 students
- A whole-school Reading Audit
- Professional Development programs for Reading Comprehension
- PAT R and PAT M testing and analysis
- Explicit teaching coaching for targeted teachers
- Literacy and Numeracy teacher support for P-3
- Early Start Reading program for Prep students

We purchased programs to support comprehension, spelling, vocabulary, and numeracy intervention and enhancement.

In line with our guarantee to develop evidence-based learning plans to address specific learning needs of students who did not reach National Minimum Standards in Literacy and Numeracy, we developed Individual Learning Plans outlining strategies and resources required to ensure appropriate remediation programs for each.

Professional development requirements of teachers assigned to implement learning plans have been identified and progressed.

We will continue to focus on reaching state-wide targets in Literacy and Numeracy standards by providing intensive support for students in deficit areas, and maintain our commitment to develop quality teaching teams to enable all students to improve Mean Scale Scores across every testing category.
